Resolved Issues

1. Resolved an issue where vendor names, customer names, bill document number, and purchase order number would not respect the 50 character limit for QuickBooks Online. (Issue #4578)

2. Fixed an issue where additional dates could not be removed when the scheduling board was open in the background. (Issue #4775)

3. Added the ability to obtain directions to a customer's billing address to both Smart Service and iFleet. This option must be enabled by client support. (Issue #4771)

4. Resolved an issue where syncing names with QuickBooks would fail to update Smart Service. (Issue #4769)
