Resolved Issues

1. Resolved an issue where email was automatically marked as a required field if any other fields were marked as required. (Issue# 5103)

2. Resolved an issue where jobs without an active scheduled date, time, and users could be sent to iFleet if the job in question maintained its recurrence pattern. (Issue #5105)

3. Fixed an issue where importing a customer>Job>Sub Job hierarchy from QuickBooks would cause a queue error when the sub job level was scheduled to iFleet. (Issue# 5087)

4. Corrected an issue where batch invoices would occasionally cause an "Invalid use of Null" when posting to QuickBooks. (Issue #5083)

5. Fixed an issue where batch posting jobs would not verify that the job had a scheduled date, time, and technician before posting. (Issue# 5047)

6. Resolved an issue when printing a blank copy of a custom work order. (Issue #5081)

7. Added a safety measure when using the copy up and copy down arrows for service addresses. If the address field you are attempting to copy over is blank, it cannot be copied up or down. (Issue #5066)

8. Corrected issues with the time picker in Enter Completed Work Orders. (Issue #5057)

9. Fixed an issue where using Google Maps from the "Print Work Orders" screen would occasionally add unselected stops to the route created. (Issue #5051)

10. Resolved an issue where history reports would improperly calculate the "Total Cost" field. (Issue #5025)

11. Corrected an issue where previewing a service agreement would not populate the "Print Preview" menu option. (Issue #5022)

12. Resolved an issue where Smart Routes would not display the total number of stops if the route exceeded 100 stops. (Issue# 4947)

13. Resolved an issue for QuickBooks Online Canadian customers could not see purchase orders created in iFleet. (Issue #5181)

14. Payment line items no longer effect the gross profit and percentage calculations on jobs. (Issue #5126)

15. Fixed an issue where Canadian taxes were not being applied to job items correctly. (Issue #5118)

16. Corrected an issue where completed jobs on iFleet would not disappear from the device after being posted. (Issue #5114)

17. Resolved an issue where Quickbooks Online service items being used as payment items would be subjected to tax rates, causing an incorrect payment to be recorded. (Issue #5102)

18. Added the ability to move job notes from Smart Service to the "Message displayed On Invoice" field in QuickBooks Online. (Issue #5059)

19. Added copy and paste functions to all fields in correspondence windows. (Issue #5011)
