Resolved Issues

1. Resolved backwards compatibility issue between iFleet and Smart Service v98 that would cause iFleet to use custom work orders when standard work orders were indicated in setup. (Issue #5418)

2. Corrected an issue preventing users from logging into Smart Service when "Get Lists" was set to run automatically and the user lacked permissions to retrieve a list in QuickBooks. (Issue #5422)

3. Improved speed to open correspondence tab. (Issue #5416)
