

Enhancements to Smart Service

1. Added setting to control which users have the ability to modify job items in iFleet. (Issue #6733)

Resolved Issues

1. Corrected an issue with batch invoicing which caused batched invoices to create a credit memo in QuickBooks rather than a paid invoice. (Issue #6721)
2. Resolved an issue with custom work orders in Smart Service when trying to print which would result in line items being duplicated on the printed document. (Issue #6714)
