

Minor Enhancements

1. Adjusted the size of the Additional Contacts section in the Job Instructions and Additional Contacts tab to improve user experience. (Issue #7891)

Resolved Issues

1. Resolved an issue in which users would receive an error message stating that “there isn’t enough memory to perform this operation”. (Issue #7728)
2. Resolved an issue with the scheduler in which the schedule fields on history records would show the active job information, rather than the historical information. (Issue #7826)
3. Resolved an issue with Job User Defined Fields that resulted in “The data has been changed by another user” error messages. (Issue #7881)
4. Resolved an issue in which some payments would not show up in the post payments screen. (Issue #7886)
5. Resolved an issue in which the “Send Estimate” button would present an error and fail. (Issue #7892)
6. Resolved an issue in which users without the “Allow Completing Work Orders / Batch Invoicing” were able to post work orders. (Issue #7893)
7. Resolved an issue in which manually marking job status as complete did not remove the “complete” button in the job record. (Issue #7902)
8. Resolved an issue for Canadian customers using QuickBooks Online which would result in a 2759 error when job items were selected before the sales tax in General Info (Issue #7908)
