

Resolved Issues

1. Resolved an issue where having the customer hierarchy set to 'Customer>Job' caused a 2465 error when opening the jobs tab. (Issue #8158)
2. Fixed an issue where custom tax rates for QBO US customers would not save to the customer record. (Issue #8101)
3. Resolved an issue where the 'Completed Date' field wouldn't clear from the system for additional dates of the job. (Issue #8143)
4. Corrected an issue where adding an invoice number in the 'Post Work Orders' screen would cause a program crash. (Issue #8152)
5. Added a new authorization feature when saving a payment to remain compliant with CardPointe. (Issue #8155)
