

Enhancements

1. Created a confirmation prompt when clicking the 'X' to close the program. (Enhancement #1563)
2. Added the ability to have your customizations to the waiting list saved. This includes the column widths and the sort order of the columns. (Issue #7342)
3. Changed the scheduled start/end dropdowns inside the scheduling tab of jobs to reflect the scheduler start/end times chosen in settings. (Issue #8291)
4. Added an information tool tip on Smart Routes. (Enhancement #8361)

Resolved Issues

1. Resolved an issue where multiple stops at the same address could not be routed with Smart Routes. (Issue #6366)
2. Corrected an issue where PO's would not save correctly when closing the PO window on a job. (Issue #8292)
3. Corrected a spelling error on the Google Calendar tab. (Issue #8351)
4. Fixed an issue resulting in a 2107 error when posting batch invoices. (Issue #8356)
5. Resolved an issue where maximizing Smart Service on high resolution monitors would result in a '(6) Overflow' error. (Issue #8374)
6. Corrected an issue where importing notes with the lookup tool would not create an audit log entry. (Issue #8379)
7. Fixed an issue where importing checklists with the lookup tool would not create an audit log entry. (Issue #8381)
8. Resolved an issue where the "include inactive jobs" would not function correctly. (Issue #8391)
9. Corrected an issue where the customization to columns would not be preserved in contacts search. (Issue #8394)
10. Fixed an issue where Google Calendar accounts could not be authorized. (Issue #8412)
