Enhancements

1. Added functionality to include a photo of the technician when using the SMS text messaging features available in Smart Service. (Issue #7435)

Resolved Issues

1. Resolved an issue in which photos would be cut off on the standard Work Order document when the "Attach Photos" option is turned on. (Issue #7313)
2. Improved functionality for importing PDF forms, which now allows the user to tap on the text or the icon to "Import form as fillable" PDF in iFleet. (Issue #7425)
3. Increased the size of preview images when taking photos through iFleet. (Issue #7439)
4. Resolved a crashing issue when attempting to add a PDF form when no equipment has been entered for a customer record. (Issue #7449)
5. Resolved an issue with service equipment UDF fields not properly displaying on forms when only one piece of equipment is serviced. (Issue #7453)
