Resolved Issues

1. Fixed an issue where the timestamp function on PDF forms would populate with the time and date instead the time only. (Issue #4078)

2. Assets removed from a job in Smart Service will now be removed from the job in iFleet upon syncing. (Issue #4696)

3. Resolved an issue where data would not populate the unit cost field when an item is first added to a job. (Issue #4718)

4. Added stability for price breaks covering items with an apostrophe in the item name. (Issue #4716)

5. Total cost for job items is now calculated based on unit cost and quantity. (Issue #4717)
