

Enhancements

1. Added functionality to sending PDF forms when not using the “Finalize Job” option to auto-populate the customer’s email address to the blank email draft that is generated by iFleet. (Issue #6658)
2. Added functionality to payment processing screen to insert the customer billing address into the billing address fields when accepting payments. (Issue #7394)
3. Added functionality to include a photo of the technician when using the SMS text messaging features available in Smart Service. (Issue #7435)

Resolved Issues

1. Resolved an issue with iFleet pricing visibility settings that would allow the user to view price information in the “Summary” section when the settings were set for “No Pricing”. (Issue #6869)
2. Resolved an issue with iFleet in which taking a photo would not give the option to use the camera’s flash. (Issue #7262)
3. Resolved an issue with Purchase Order functionality that would result in the line items added to a purchase order to not appear in the purchase order item list. (Issue #7455)
