

Enhancements

1. Added the ability to scan checks via the device camera. (Issue: #7419)

Resolved Issues

1. Resolved an issue where the “Signed By” field being left blank would display “NULL” on work order documents from iFleet. (Issue #7285)
2. Resolved an issue with iFleet on the iOS platform not showing purchase order items after adding them to the purchase order. (Issue #7324)
3. Resolved an issue with estimate documents generated in iFleet not respecting Settings > Estimates > Include estimate UDFs on estimate. (Issue #7275)
4. Resolved issues for iFleet on the iOS platform using “Dark Mode” resulting in display inconsistencies and causing difficulty reading text and/or making out icons. (Issue #7343/7345)
5. Resolved an issue with iFleet on the iOS platform using Dark Mode which resulted in the Purchase Order “Add Item” button blended in with the background. (Issue #7401)
6. Resolved an issue with group items in iFleet in which removing the top line of the group item does not remove all associated items from the group. (Issue #7400)
7. Resolved an issue with iFleet where selecting certain equipment fields resulted in the iFleet application crashing. (Issue #7402)
