Enhancement Requests

1. Added a new UI indication on jobs updated by the office. (Issue #7517)
2. Updated labels for "Item and Quantity" fields when using "Add Equipment" to improve clarity for end users. (Issue #7581)

Resolved Issues

1. Added the front facing camera functionality back to iFleet camera functions. (Issue #7297)
2. Resolved an issue with the start/stop timer option in Job Items where the timespan for the start/stop were not calculating correctly. (Issue #7500)
3. Resolved an issue with employee names containing double spaces between first/last names that resulted in a crash when attempting to create an estimate. (Issue #7506)
4. Resolved an issue with the edit pencil for the contact information section covering part of the job name field when job names are long. (Issue #7515)
5. Resolved an issue that would allow iFleet users to add more than two decimal places to job item amount field. (Issue #7575)
6. Resolved an issue when clearing the item search filter not resetting the search screen. (Issue #7583)
7. Resolved an issue with "Serviced" and "Maintenance Required" not saving immediately, resulting in the settings being reset when hours are added to an Asset. (Issue #7584)
