Enhancements

1. Added compatibility for the new "Service Email" field from Smart Service. (Enhancement #8490)

2. Added a "missing item" warning if an item no longer exists in QuickBooks. (Enhancement #8495)

3. Latitude/Longitude will now be used for mapping instead of the service address, provided longitude/latitude was entered in Smart Service. (Enhancement #8513)

4. iFleet can now use the 'URL' type user-defined field. (Enhancement #8504)

Resolved Issues

1. Fixed an issue where Customer and Job User-Definable Fields would not render properly on the standard work order. (Issue #8575)

2. Resolved an issue where taking photos via iFleet on specific devices would cause an error. (Issue #8502)
