

Enhancements

1. Revamped the item selection screen for Job Items to include item icons and more information. (Enhancement #9759)
2. Added support for the Manufacturer Part Number field from QuickBooks. (Enhancement #9760)
3. Added support for the Preferred Vendor field from QuickBooks. (Enhancement #9761)
4. When processing a payment, you can now choose whether to process the payment, save the payment method, or both. (Enhancement #9769)
5. Adding a job item now takes you directly to the item selection list. (Enhancement # 9774)

Resolved Issues

1. Resolved an issue where item descriptions were not visible on the Job Summary screen. (Issue #9663)
2. Fixed an issue that would cause iFleet to crash if invoice terms were set so they would be due on a nonexistent day. (Issue #9728)
3. Corrected the employee list sorting for the job item timer function. (Issue #9732)
4. Fixed an issue that could cause iFleet to crash when attempting to use a group item if the group item list has not yet been imported. (Issue #9733)
5. Resolved an issue that would cause purchase orders to be cleared from iFleet prematurely. (Issue #9734)
6. Corrected an issue with tax calculation when Payment type items are present on a job. (Issue #9739)
7. Corrected an issue with due date appearing on invoices with “Due upon receipt” terms. (Issue #9773)
8. Fixed an issue with opening the app on devices running Android version 14. (Issue #9780)
