Resolved Issues

1. Corrected an issue where the job item timer function would record the time incorrectly. (Issue #10121)
2. Fixed an issue where selecting an existing payment wouldn't populate the memo field as expected. (Issue #10133)
3. Fixed an issue where selecting an existing payment wouldn't populate the transaction number field as expected. (Issue #10134)
4. Resolved an issue which could cause iFleet to crash if the linked Smart Service database is on a significantly older version. (Issue #10148)
5. Corrected an issue where iFleet could crash after sending a Twilio message. (Issue #10149)
6. Fixed an issue with Assets where the visibility of the Log Hours field would not be set correctly based on the Asset Type. (Issue #10152)
7. Resolved an issue when editing purchase order items which would cause the Save button to disappear when editing amount. (Issue #10154)
8. Fixed an issue with credit card payments that would allow invalid entries for expiration date and CVV fields. (Issue #10156)
