

## Enhancements

1. Added the ability to capture a credit card's expiration date with the card capture feature for collecting payments. (Enhancement #8476)
2. Added compatibility for the new "Service Email" field from Smart Service. (Enhancement #8490)
3. iFleet can now use the 'URL' type user-defined field. (Enhancement #8504)

## Resolved Issues

4. Resolved an issue where removing an additional employee in the office would not remove said employee from the 'assigned employees' section of iFleet when resent. (Issue #8110)
5. Corrected an issue where items were case-sensitive in iOS only. (Issue #8483)
6. Fixed an issue where dark mode was inconsistent. (Issue #8507)
7. Improved speed and rendering of custom PDF documents. (Issue #8549)
