

## Enhancements

1. The ability to create prospects, prospect locations, and prospect jobs has been added to iFleet. To have this option appear, your user profile back in the office must have the appropriate permissions enabled. (Enhancement #8208)
2. Users now have the ability to view the subtotal on purchase orders created in iFleet. (Enhancement #8601)
3. The "Check" payment type has been appropriately changed to "E-Check". (Enhancement #8614)
4. Provided a new naming scheme for serviced equipment UDF's (Enhancement #8636)
5. Added the option to search by address when creating a job via iFleet. (Enhancement #8760)

## Resolved Issues

1. Resolved an issue where files viewed from Dropbox would remain locally on the device. (Issue #8618)
2. Fixed an issue where customers without merchant services would have access to a non-functional credit card payment screen. (Issue #8631 and 8673)
