

## Enhancements

1. Serviced equipment history is now visible on history records in iFleet. (Enhancement #8915)
2. Smart Service and iFleet will now show both the job total and the customer total on work orders/invoices when “Include Customer Total” is checked. (Enhancement #8668)

## Resolved Issues

1. Fixed an issue where checking the “serviced” checkbox for a given equipment record would mark the wrong equipment record as serviced. (Issue #8898)
2. Resolved an issue where legacy forms could not be reopened once added to the job. (Issue #8907)
3. Corrected an issue where history marked as “skipped” would not be shown as skipped in iFleet history. (Issue #8951)
