Enhancements

1. Added an option to settings to show a more compact version of the job items list. (Enhancement #9794)
2. Added support for the new Estimate template added in Smart Service version 120. (Enhancement #9840)
3. Added support for the option to hide inventory items from the work order, added in Smart Service version 120. (Enhancement #9876)
4. The iFleet work order will no longer list the Billing Address if "Hide Billing Address" is selected in iFleet settings in Smart Service. (Enhancement #9902)

Resolved Issues

1. Fixed an issue where replacing an existing job item with a group item would result in the group's sub-items not being added. (Issue #9804)
2. Corrected an issue that would cause credit card payments to fail to process if the card number was entered using the camera scan feature. (Issue #9808)
3. Resolved an issue that could cause PDF forms to fail to render correctly after using the "take photo" option on a photo field within the form. (Issue #9815)
4. Photo upload errors will no longer cause the iFleet queue to stop processing. (Issue #9839)
5. Updated the photo naming convention to avoid an issue where QuickBooks cannot read the file name. (Issue #9841)
6. Resolved an issue for iFleet forms with a Pay Now link, where the CardPointe payment page would still ask for the full job amount even if a partial payment was already received. (Issue #9860)
7. Fixed an issue where the Invoice document would incorrectly show a dollar sign on the Quantity column. (Issue #9877)
