

Resolved Issues

1. Resolved an issue where the print dialog would override the default printer preferences. (Issue #8337)
2. Fixed an issue where the user would be presented with an error when running 'Get Customers' stating '(5) An item with the same key has already been added.' (Issue #9347)
3. Corrected an issue where certifying the address on a parent record would not update the identical addresses on the child records, provided they are the same address. (Issue #9389)
4. Resolved an issue where users received an error when attempting to email a payment receipt to their customers. (Issue #9441)
5. Fixed an issue where QuickBooks Online (CA) users would receive an error when viewing the job items tab. (Issue #9442)
6. Corrected an issue where the Bing address confidence indicator would not appropriately display different colors depending on confidence level. (Issue #9047)
